Skills

- **Languages**: Python, Java, C, C++
- **Frameworks**: Scikit-learn, XGBoost, Hugging Face Transformers, RoBERTa
- **Tools/Platforms**: Git, GitHub, FastAPI, Streamlit
- **Soft Skills**: Time Management, Teamwork, Punctuality, Adaptability

Projects

Named Entity Recognition (NER) for Government Notifications | GITHUB *January'26*

- Collected and curated ~40 government notification PDFs from official public sources and manually annotated domain-specific entities using **BIO tagging format** to create a custom labeled dataset.
- Fine-tuned **RoBERTa** for **token classification** using **Hugging Face Transformers** to adapt to formal administrative and legal language.
- Achieved **85.7% micro F1-score** and **86.0% weighted F1-score** on the test set through hyperparameter tuning and class balancing.
- Designed a complete **NLP pipeline** including PDF preprocessing, token alignment, entity tagging, and structured JSON output generation.
- Identified class imbalance challenges (e.g., POST_NAME entity) and implemented optimization strategies to improve generalization.

Career Guidance Tool | Machine Learning Model GITHUB *April'25*

- Designed and implemented a **machine-learning model** to recommend best-fit career paths to students by analyzing their skills, interests, and personality traits.
- Built a fully interactive user interface using **Streamlit,** enabling students to input assessments and receive real-time personalized career recommendations.
- Improved model accuracy by **10%** and reduced inference latency by **35%** through hyperparameter optimization.

Training

AI Powered NLP- Algotutor *August'25*

- Completed specialized training focused on **Generative AI**, **LLM architectures**, **prompt engineering** workflows, and **Retrieval-Augmented Generation** (RAG) systems
- Gained extensive hands-on experience with **LLM APIs**, **AI agents**, vector databases (FAISS / Pinecone), memory systems, and multimodal models for text, image, and document processing.
- Engineered multiple end-to-end GenAI applications, including **persona-based chatbots**, **RAG-powered question-answering systems**, **AI research assistants**, and autonomous agents.

Certificates

- AI Powered NLP for Summer Training Program | Algotutor Link *August'25*
- ChatGPT-4 Prompt Engineering | Infosys Springboard Link *June'25*
- Build Generative AI Applications | Infosys Springboard Link *December'24*

Achievements

- Solved 200+ DSA problems across LeetCode, HackerRank, and GeeksforGeeks
- Earned **5★ rating in Problem Solving** and **5★ in Programming Language** on HackerRank

Education

Lovely Professional University Phagwara, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.33 *August'23 - Present*

Oxford Public School Hisar, Haryana
Intermediate; ***Percentage: 86%*** *April'22 - March'23*

Lotus International School Hisar, Haryana
Matriculation; ***Percentage: 86%*** *April'20 - March'21*
